

## PROTECTIVE MEASURES

As the administrative authority with jurisdiction pursuant to Section 80(1)(h) of Act No. 258/2000 Coll., on the Protection of Public Health and on amendments to some related acts, as amended (hereinafter "Act No. 258/2000 Coll."), the Ministry of Health **orders** the following protective measures, by the procedure pursuant to section 68(1) and (3) of Act No. 258/2000 Coll., to protect against the introduction of the new coronavirus 2019-nCoV from foreign countries through international airports in the Czech Republic:

### I.

**All airlines operating direct international flights from the Korean Republic, with passengers on board the aircraft, to all airports within the territory of the Czech Republic,** are forbidden to operate these flights effective from Thursday, 5 March 2020 until this protective measure is withdrawn.

### II.

This protective measure becomes valid on the date it is announced.

### Reasoning:

This extraordinary measure is issued in relation to the unfavourable development of the epidemiological situation in relation to occurrence of the COVID-19 disease caused by the new coronavirus identified as SARS-CoV-2 in the Korean Republic, where this infection has been confirmed in over 4,300 patients to date. The purpose of this measure is to create conditions preventing the spread of this disease.

The new coronavirus identified as SARS-CoV-2 is causing an exponentially-growing epidemic in the Korean Republic, with the potential to double the numbers of infected individuals every 5 to 7 days and with a mortality rate of around 2.5%. Not even strict anti-epidemic measures within the Korean Republic are currently leading to its effective control and this disease has now also spread to the European continent and to the Czech Republic. For the reasons set out above it is desirable to restrict or forbid direct flights to and from the Korean Republic until the time the epidemic is under effective control.

This measure applies to all airlines operating direct flights from the Korean Republic to the Czech Republic.

This measure is one of the important conditions for preventing the further introduction and spread of infection by the coronavirus SARS-CoV-2 within the territory of the Czech Republic.
