Rationale:

This Extraordinary Measure is issued in relation to the implementation of measures adopted to limit the spread of COVID-19 caused by the novel SARS-CoV-2 coronavirus in the Czech Republic.

To ensure the efficacy of the vaccination process, it is necessary for the entity conducting vaccination against COVID-19 to provide data about the distribution of vaccines to its warehouse, use of the vaccines and dispensing of the vaccines to another healthcare service provider. Furthermore, it is necessary to manage the logistics process of complementary material in the case of its shortage on the market.

It is essential that all types of vaccination centers use the unified Central Reservation System (CRS), and that the prioritization of persons interested in vaccination be formally established. The CRS processes the personal data of persons interested in vaccination pursuant to Art. 6(1)(e) and Art. 9(2)(i) of GDPR, as essential to fulfil a task performed in public interest, to which the Ministry of Health as the controller is authorised in the area of public health to protect against serious health threats. Those interested in vaccination shall be informed about the processing of their personal data when completing the form. Personal data shall be processed in compliance with GDPR.

All healthcare service providers performing vaccination against COVID-19 shall proceed pursuant to Extraordinary Measure Ref. No. MZDR 60876/2020-1 /MIN/KAN, where data about the performed vaccination shall be recorded immediately in the Information System of Infectious Diseases (ISIN), COVID-19 Patient module. The report will be made upon logging into the website of the EREG department health registries at <https://ereQ.ksrzis.cz/>.
